

FLUID POWER MARKET IN TURKEY

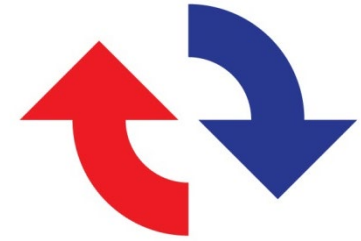

CETOP Market Outlook 2021/ 10

07.10.2021

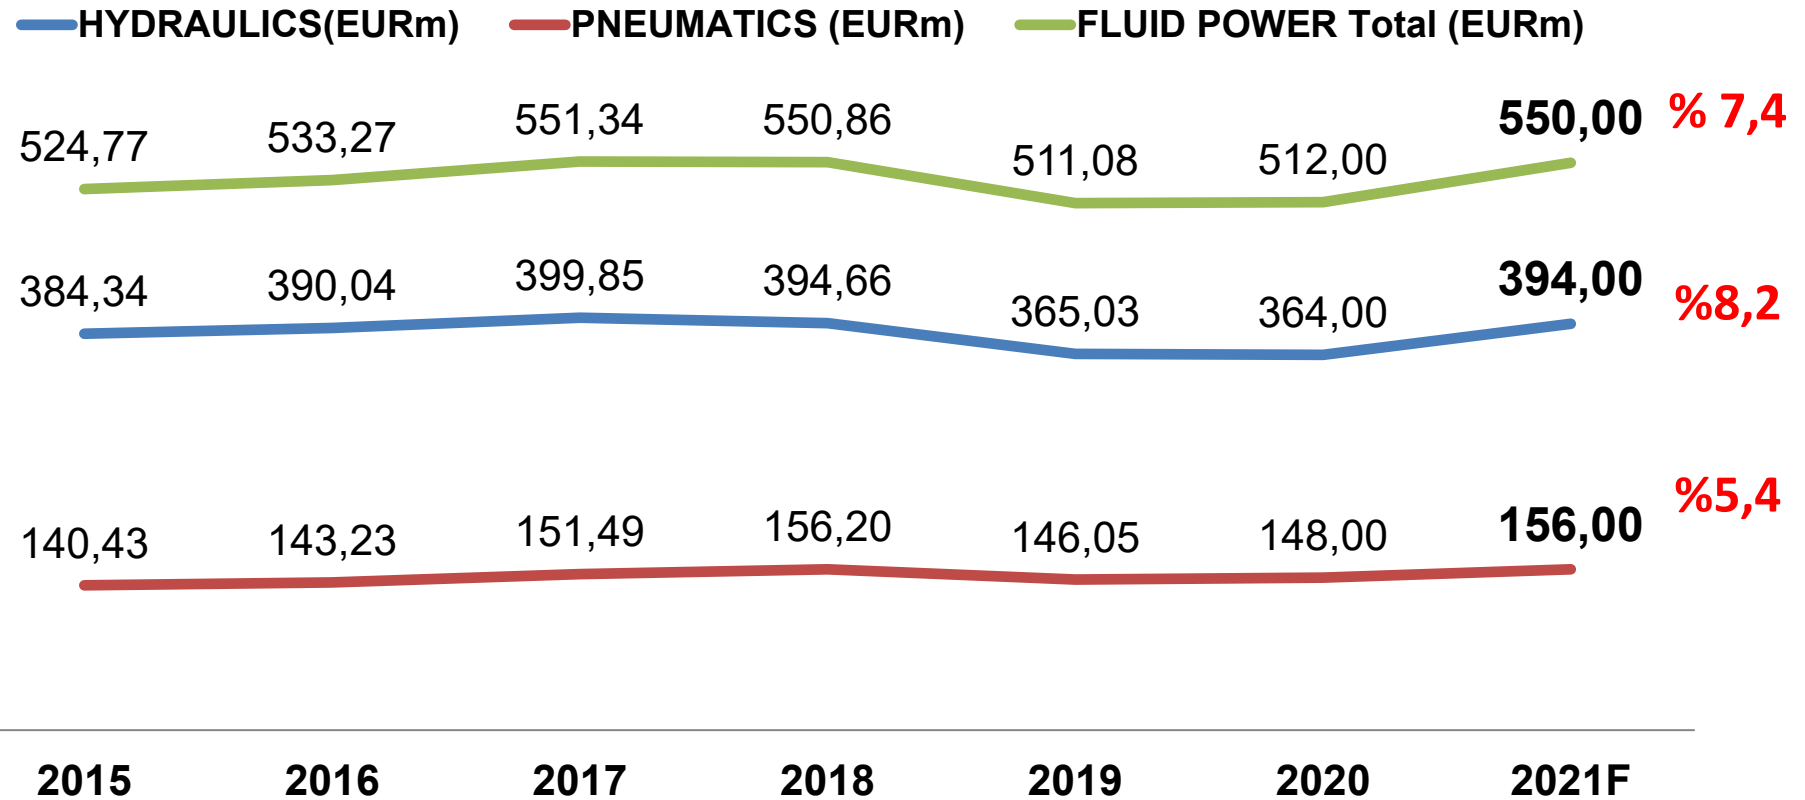

FLUID POWER INDUSTRY / HOME SALES

TURKEY 2015 - 2021

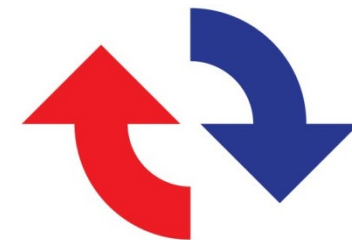

FLUID POWER TURKEY - AKDER

At the end of the year, our industry seems to be reaching its targets.

FLUID POWER INDUSTRY IN TURKEY

Continuing Negative Things:

For FPI & Sector (Producer/Import/Export)

- High energy cost
- High raw material cost
- High transport cost
- Not enough material / Long term
- Exchange rate is still very volatile

For People;

- High Inflation / Reduction in Purchasing Power
- High Food Prices & Energy Prices
- Rising Unemployment
- Uncertain health future

Ongoing Positive Things:

For FPI & Sector (Producer/Import/Export)

- Order level is good and stable

For People;

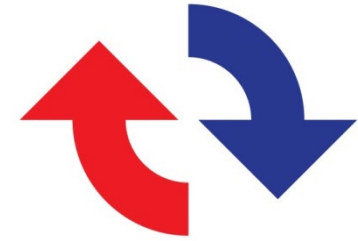

- Factories, schools open disease under control

The first 4-6 months of 2021 were running, we have been walking for the last 3 months.

If we can go at the same speed until the end of June 2022, we will be lucky.

Play it safe - Pay attention to collection

CASH is KING

THANK YOU...
