

Hose Integrity, Inspection and Management Theoretical Online Training Course

This 3 hour online course is aimed at those people responsible for hose inspection and management from a wide variety of industry sectors, to help establish a recognised standard in hose management practice.

The course centres around core issues surrounding the efficient inspection, analysis, identification, registering and recording of hydraulic hose including:

Hose Assembly – Life expectancy
Risk Analysis
Competence Assurance
Identification, inspection and recording
Hose Registration
Visual Inspection

Damage along almost the full length of each hose assembly
