

Thread Awareness Online Theory Training Course

This 3 hour online training course provides delegates with an appreciation of how to correctly identify an end termination, using a range of measuring instruments and gauges in conjunction with tabulated data to positively identify a range of fittings and adaptors. Selection of the correct product and its pressure rating is crucial as is awareness of health and safety best practices.

COURSE CONTENT COVERED:

End termination identification
Methods of sealing and o-ring selection
BSP parallel
BSPT
JIC
SAE 45° flare
Flange
ORFS
Metric light duty
Metric heavy duty
Metric o-ring port / stud end
French GAZ
NPT
BSP – Japanese
SAE 'o' ring port / stud end
Komatsu – metric
Concentric Circles
Application of PTFE tape and paste
Thread Galling
Cone and thread connections both medium (20k) and high pressure (60k)
